

Volvo TAD734GE diesel engine

Leroy Somer LSA 46.2 L6 alternator

Standard Generator Features

- AMF, Automatic mains failure unit
- Heavy duty type, 6 cylinder, water cooled engine
- ♦ 55°C tropical type radiator
- Starter motor
- ♦ Lead acid battery
- Charging alternator
- ♦ Battery charge redressor
- Heavy duty, brushless type alternator
- Base frame with anti-vibration units
- Industrial type silencers
- ♦ Flexible exhaust compensator
- ♦ Block water heater unit
- ♦ Control panel with digital-automatic main control module
- Fan, fan drive, charging alternator drive and all rotating parts covered
- Radiator matrix covered by metal mesh against the mechanical damages
- Fabricated and welded steel base frame
- Anti-vibration mountings
- Engine and alternator manufacturer test reports
- Factory load, performance and function tests

Optional Features

- Automatic load transfer panel
- Automatic syncronization and power sharing systems
- Soundproof canopy
- Container type enclosers
- Road trailer
- ♦ Job-site trailer
- Protection circuit breaker
- ♦ Air start
- ♦ Remote type radiator
- ♦ Base fuel tank
- External type fuel tank
- Automatic fuel transfer system
- Residential silencer

Volvo TAD734GE Engine

Standard Features

The TAD734GE is a powerful, reliable and economical Generating Set Diesel built on the dependable in-line six design.

Low exhaust emission

The state of the art, high-tech injection and charging system with low internal losses contributes to excellent combustion and low fuel consumption. The TAD734GE complies with EU Stage 2 exhaust emission regulations.

Easy service & maintenance

Easily accessible service and maintenance points contribute to the ease of service of the engine.

Cooling System

Туре Tropical, heavy duty type

Ambient temperature, °C 55 32 Engine+Radiator coolant cap., Liters Jacket coolant flow, Liters / sec 3.6

- ◆Belt driven, maintenance-free coolant pump with high degree of efficiency
- Efficient cooling with accurate coolant control through a water distribution duct in the cylinder block

Engine and Block

- ◆Piston cooling for low piston temperature and reduce ring temperature
- ♦Drop forged steel connecting rods
- ♦Keystone top compression rings for long service life
- ◆Replaceable valve guides and valve seats
- ◆Three PTO positions at flywheel end
- ◆Lift eyelets
- ♦Flywheel housing with connection acc.to SAE2
- ♦Flywheel for flexplate
- ◆Transport brackets

Electrical System

24 Volt, 100Amp Alternator Starter motor (DC) Melco

Starter motor power,kW 5.0

- Deep centre oil sump driven by the crankshaft
- Oil filter on top

Leroy Somer LSA 46.2 L6 Alternator

Standard Features

Top of the Range Electrical Performance

Class H insulation

Standard 12-wire re-connectable winding, 2/3 pitch

High efficiency and motor starting capacity

R 791 interference suppression conforming to standard EN 55011 group 1 class B standard for Europen zone (CE marking)

Protection System Suited to the Environment

The LSA 46.2 is IP21

Reinforced Mechanical Structure Using Finite Element Modelling

Compact and rigid assembly to better withstand generator-set vibrations

Steel frame

Cast iron flanges and shields

Twin-bearing and single bearing versions designed to be suitable for engines

on the market

Half-key balancing

Greased for life bearings (regreasable bearings optional)

Accessible Terminal Box Proportioned for Optional Equipment

Easy access to the voltage regulator and to the connections

Possible clusion of accessories for paralelling, protection and measurement

8 way terminal block for reconnecting voltage reconnection

Compliant with International Standards

The LSA 46.2 alternator conforms to the main international standards and regulations:

IEC 60034, NEMA MG 1.22, ISO 8528, CSA, CSA/UL

It can be integrated into a **CE** marked generator set

The LSA 46.2 is designed, manufactured and marketed in an ISO 9001

environment

- ♦Filters on air inlet and air outlet (IP44)
- ♦ Windign protection for clean environmetrs with relative humidity greater than 95%
- Space heaters
- ♦Thermal protection for winding
- ◆Digital voltage regulator
- ◆PMG system

Control Panel

Standard Equipments

- ◆Datakom DKG307 digital automatic control module
- ◆Hourmeter
- ◆Emergency stop button

Features

Automatic mains failure with genset control and protection

Remote Start operation capability

Analogue temperature and oil pressure inputs

Genset KW and Power Factor measurement

Engine hours run counter

Periodic maintenance request display

165 programmable parameters

Battery backed-up real time clock

Weekly operation schedule programs

Daily, weekly, monthly exerciser

Event logging with time stamp

Statistical counters

Serial RS-232 data output for telemetry on PC

Free MS-Windows remote monitoring SW

Configurable analogue inputs: 2

Configurable digital inputs: 7

Configurable relay outputs: 2

Output expansion capability

Small dimensions (155x115x48mm)

Datakom DKG307 Control Module

Description

◆The DKG-307 is a comprehensive AMF unit for a single generating set operating in standby mode.

◆In AUTOMATIC position, DKG-307 monitors mains phase voltages and controls the automatic starting, stopping and load transfer of the generating set in case of a mains failure and once the generator is running, it monitors internal protections and external fault inputs. If a fault condition occurs, the unit shuts down the engine automatically and indicates the failure source with the corresponding red led lamp.

⋄The DKG-307 provides a comprehensive set of digitally adjustable timers, threshold levels, input and output configurations and operating sequences. The unauthorized access to program parameters is prevented by the program lock input.All programs may be modified via front panel pushbuttons, and do not require an external unit.

◆The fault conditions are considered in 2 categories as Warnings and Alarms. Measured values have separate programmable limits for warning and alarm conditions.

♦ The service request indicator lamp turns on at the expiration of either engine hours or time limits.

olt is possible to monitor the operation of the system locally or remotely with the WINDOWS based PC utility program.

The unit is designed for front panel mounting. It is fitted into the cut-out with the steel spring removed. Connections are made with 2 part plug and socket connectors.

Information

Power Ratings

Standby power rating is for the supply of emergency power at variable load for the duration of the non-avalaibality of the mains power supply. No overload capacity is available at this rating. A standby rated engine should be sized for an avarage load factor of 80% based on published standby rating for 500 operating hours per year. Standby ratings should never be applied except in true emergency power failure conditions.

Prime power rating is available for unlimited hours per year with a variable load of which the average engine load factor is 80% of the published power rating, incorporation of a 10% overload for 1 hour in every 12 hours of operation which permitted

Continuous power rating is available for continuous full load operation.No overload is permitted.

Acc. to ISO 3046/1, BS 5514, DIN6271
